

## Make Me Smile (Come Up with a Vaccine)

You've done it all; you've put us into lockdown  
And pushed health services to the wall  
You spoilt our lives, no matter how you began  
For no good reason, but to harm  
Virus, virus  
How can you ruin so many lives?

Come up with a vaccine to make us smile  
While we self-isolate, all the while

There's nothing left, but social distancing  
And hand washing to Happy Birthday singing  
We need to protect our health service from demise  
And thank those working there and others beside  
Conform, conform  
It's for ourselves, we have to protect

Come up with a vaccine and make us smile  
While we self-isolate, all the while

There ain't no fun, it's been taken all away  
But we know it will return some day  
We can't ignore our faith is to win  
And in the meantime, we'll take it on the chin  
Eureka, Eureka  
We're waiting desperately for you

To come up with a vaccine to make us smile  
While we self-isolate, for all the while

Come up with a vaccine to make us smile  
While we self-isolate, all the while
